OneCell.ai · MedTech — 2022 — Present
Senior Java Developer

- Designed and developed integration APIs with external heterogeneous systems.
- Mentored and coached 3 colleagues on the team.
- Implemented code generation for client-server APIs with the tracing in the mind.
- Continuously enhanced digital workspace and project code style.
- Adapted development processes to rapidly changing requirements, enabling faster releases.
- Maintained a comprehensive understanding of the entire project's code base.

OneCell.ai · MedTech — 2020 — 2022
Java Developer

- Designed and developed the MVP of the platform backend within a 2-month timeframe.
- Restructured a monorepo with modules into 10+ independent repositories for separate versioning of microservices, ensuring correct Git history rewriting.
- Mentored and coached 2 colleagues on the team.
- Enhanced the Notion workspace, streamlining task management and optimizing team collaboration.

Grid Dynamics International · FinTech — 2019 — 2020
Java Developer

- Performed technical design, development, code review, and creation of test cases for backend systems.
- Prepared demo-scripts and showed demo.
- Worked with Scrum methodology.

Bussiness Stability · FinTech — 2017 — 2019
Full Stack Engineer

- Developed backend and frontend for system from scratch.
- Integrated with 3 third-party systems to perform background checks on individuals.
- Implemented OAuth provider and public API for seamless integration with our service.

Past experiences — 2016 — 2018
Full Stack Engineer

I started my career in 2016 working as a PHP developer, creating a webapp for taxi ordering with a interactive map, taxi meter with GPS for drivers and a price calculator for clients.
In 2017 I ran my own pet project which allowed to manage school and University timetables with ability to import a schedule from widespread online school timetable system in Russia and an app for Android with widgets.

SKILLS

Java
Spring Boot
JDBC, JPA/Hibernate
Hazelcast, Redis
Kafka
Postgres, MySQL
WebSocket
TypeScript, Python
HTML, CSS, JavaScript

EDUCATION

Infocomm and Digital Media, 2022-2023
ITMO University
Master's degree

Computer Science and Engineering, 2017-2021
State Technical University of Saratov
Bachelor's degree

Aptech Certified Software Technology Specialist, 2020
Aptech / en.SSTU.ru
Certificate

Web Development with Java and Spring, 2019
GridU / Grid Dynamics
Certificate

LANGUAGES

Russian
Native proficiency

English
Upper Intermediate / B2
